Introduction
Data Analysis and Coding
ADaM Metadata
• Example 1: Analysis of Treatment Emergent Adverse Event
• Example 2: Analysis of Hemorrhages (SMQ) among Treatment Emergent Adverse Events by Sex
• Example 3: Analysis of Peripheral Sensory Neuropathy (PSN) Adverse Events by Severity and Cumulative Dose Exposure
• Example 4: Analysis of Treatment Emergent Adverse Events in a Cross-Over Interaction Study
• Example 5: MedDRA Secondary Path
• Example 6: Analysis of Adverse Events that Change over Time
• Example 7: Analysis of Adverse Events from Multiple Input Domains
• Example 8: Analysis of Concomitant Medications
• Example 9: Analysis of Medical History Mapped to MedDRA
• Example 10: Analysis of Medical History Pre-specified Events
• Example 11: Analysis of Protocol Deviations
• Appendices
