Problem

Built-in or third party popup blocker may interfere sign-on experience when accessing the Data Standards Browser or the API Management Developer Portal

Solution

Due to variety of popup blocker implementations, we recommend these actions:

1. Review web browser documentation for default popup blocker behavior. If possible, whitelist cdisc.org to prevent future blocking.
2. Review web browser's extensions installed. If possible, whitelist cdisc.org to prevent future blocking.
3. Some ad blockers come with popup blocking functionality. If possible, whitelist cdisc.org to prevent future blocking.
