1 INTRODUCTION
   1.1 Purpose
   1.2 Organization of this Document
   1.3 Controlled Terminology
   1.4 Provisional Content

2 SUBJECT-LEVEL CHARACTERISTICS
   2.1 Purpose - Subject-level Characteristics
   2.2 Subject-level Variables for ADSL
      2.2.1 Initial Diagnosis
      2.2.2 Cancer Staging
      2.2.3 Pathology
      2.2.4 Molecular Markers by Laboratory
      2.2.5 Overall Histological Classification
      2.2.6 Prior Disease Progression
      2.2.7 Prior Treatment/Therapies
      2.2.8 Performance Status at Baseline
      2.2.9 Substance Use
      2.2.10 Tumor Load and Metastasis by Location
      2.2.11 Variables for Interim Analysis and Censoring
   2.3 Subject-level Parameters for Analysis Datasets for Baseline Characteristics (ADBASE)
   2.4 Subject-level Variable and Parameter Naming Fragments

3 CYCLE DERIVATION (ADCYCLE)
   3.1 ADCYCLE Purpose
   3.2 ADCYCLE Metadata
   3.3 ADCYCLE Parameters
   3.4 ADCYCLE Example

4 LABORATORY RESULTS (ADLB)
   4.1 ADLB Purpose
   4.2 Bi-directional Toxicity Grading Using CTC Grading from CTCAE v4.03
      4.2.1 ADLB Background
      4.2.2 Data
      4.2.3 Determining Shift from Baseline
      4.2.3.1 Creating New Variables
      4.2.3.2 Using Programming Logic
      4.2.4 Disclaimer
      4.2.5 Rationale

5 STUDY DRUG EXPOSURE (ADEXP AND ADEXSUM)
   5.1 ADEXP and ADEXSUM Purpose
   5.2 Exposure Analysis Dataset (ADEXP)
   5.3 Exposure Summary Analysis Dataset (ADEXSUM)
   5.4 ADEXP and ADEXSUM Examples

APPENDICES
Appendix A: Glossary and Abbreviations
Appendix B: Representations and Warranties, Limitations of Liability, and Disclaimers
